

Part is symmetrical left to right except for the hole on the bottom left. All holes are equal in diameter and distance from the indent.

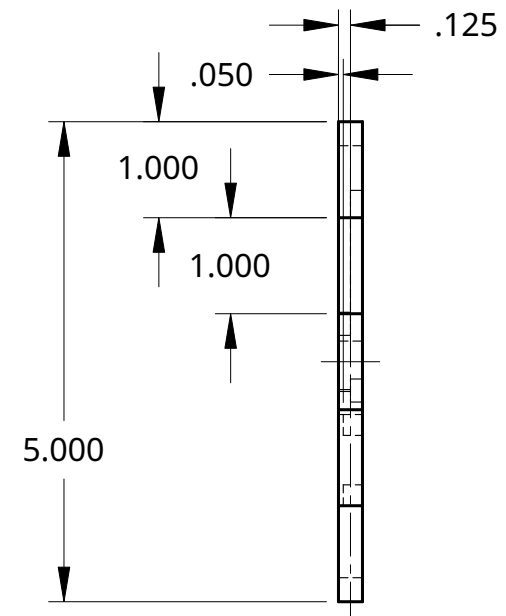

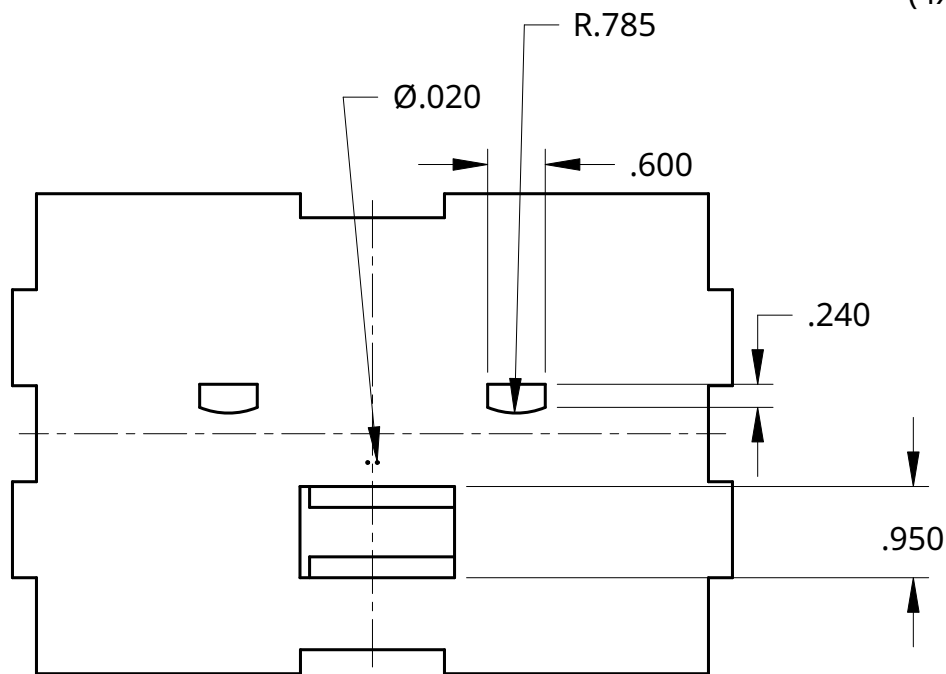

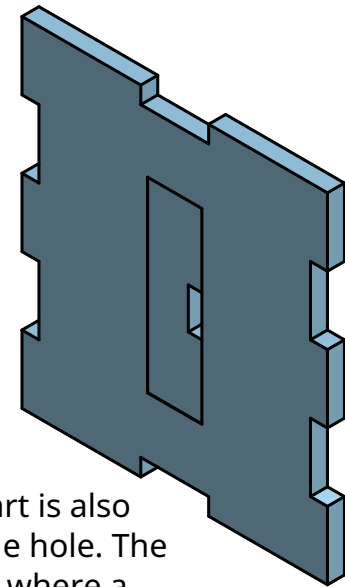

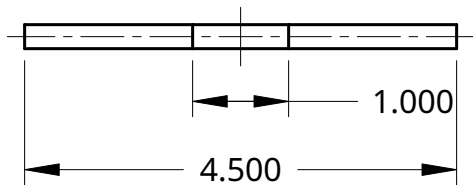

Part is symmetric top to bottom and left to right.

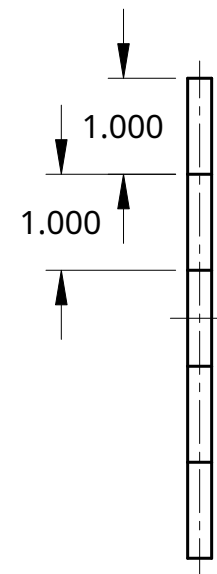

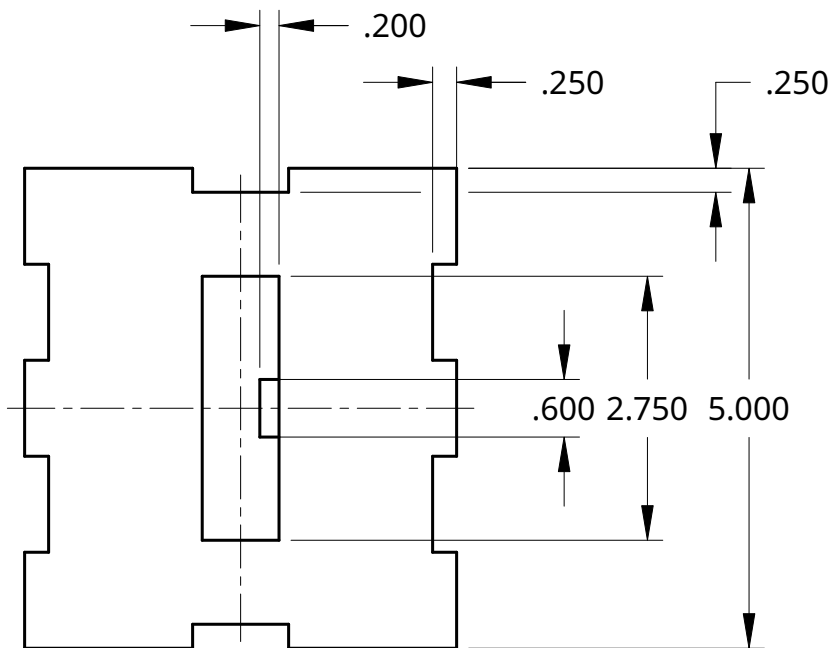

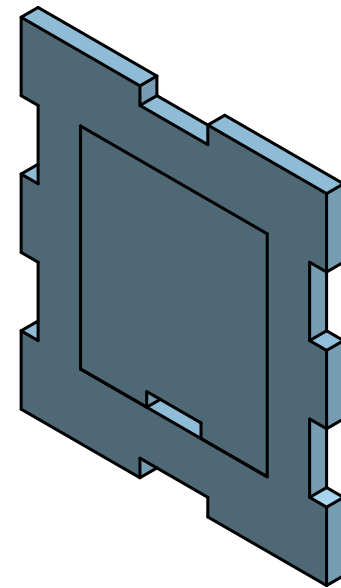

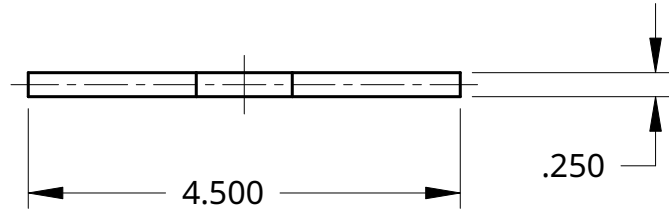

Notch on the top is equal to the notch on the bottom, and same with the side notches (4x).

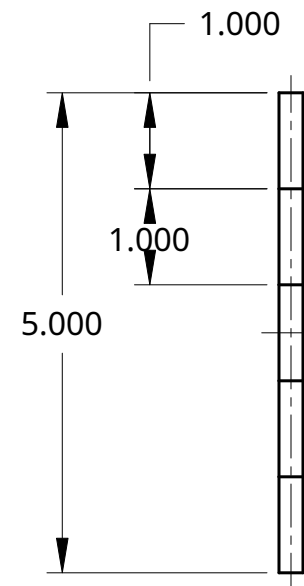

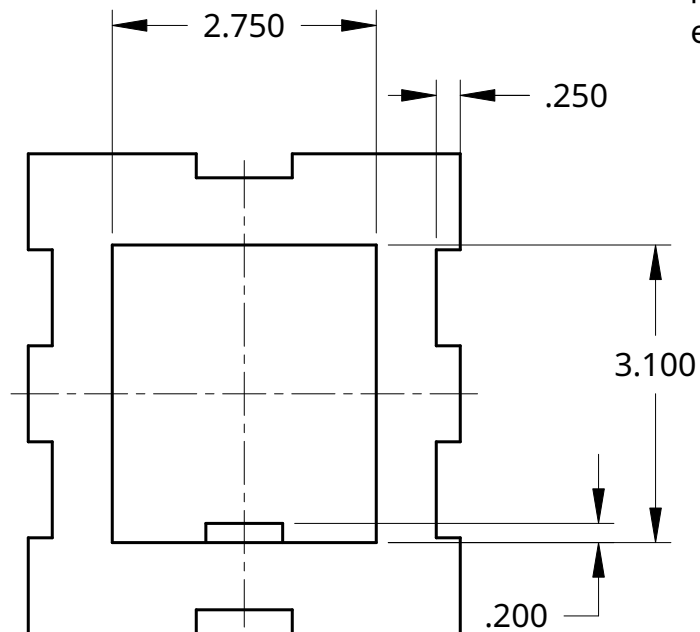

Part is symmetric top to bottom. Part is also symmetric left to right excluding the hole. The indent in the middle is just to show where a part is placed. This part does not require that to be a physical indent.

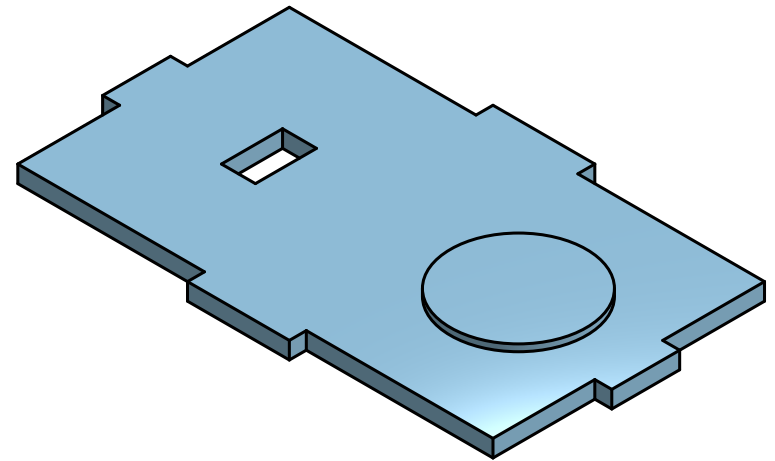

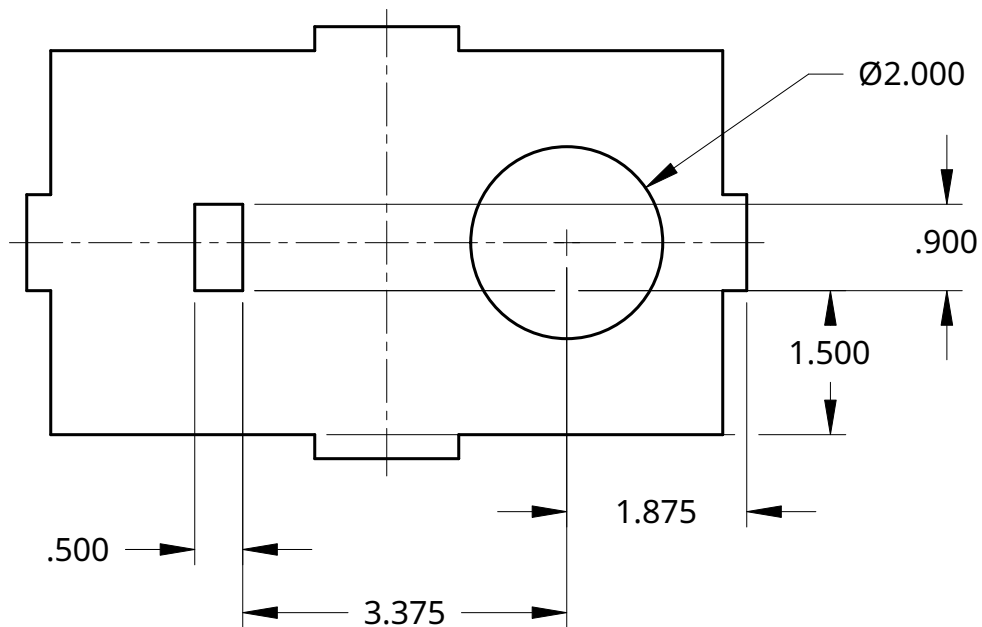

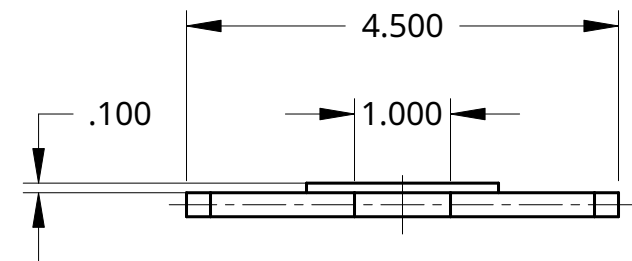

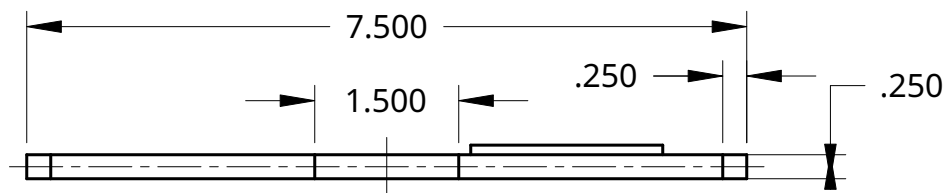

Part is symmetric left to right. Also symmetric top to bottom, excluding the hole. The indent in the middle is only to show where a part goes. It is not necessary when manufacturing the part. The notches on the side are all equal in geometry.

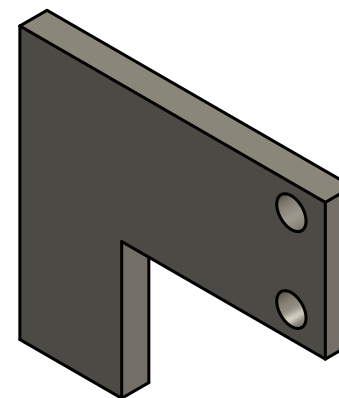

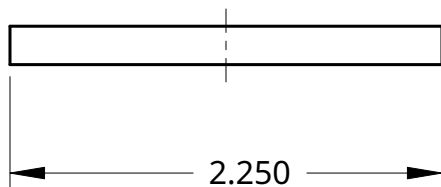

The Ohio State University First Year Engineering	Dwg. Title: Right Side Panel	Scale: 1:2
	Drawn By: Sam Lanier	Units:IPS

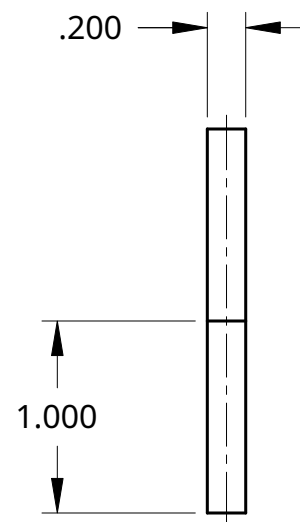

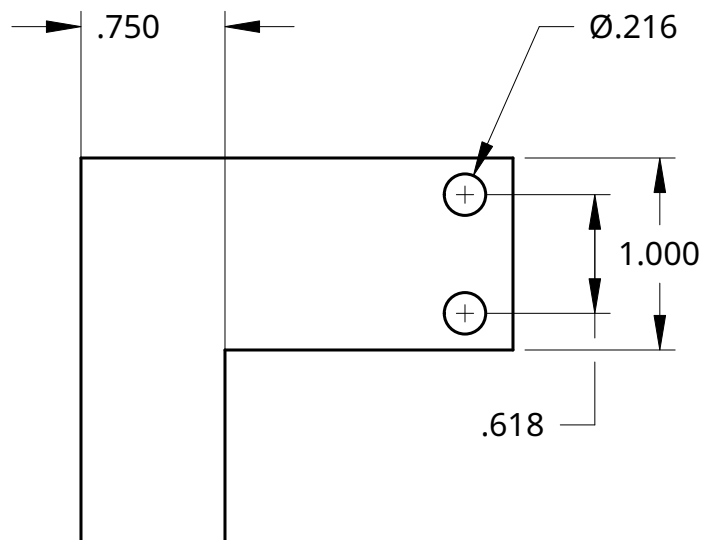

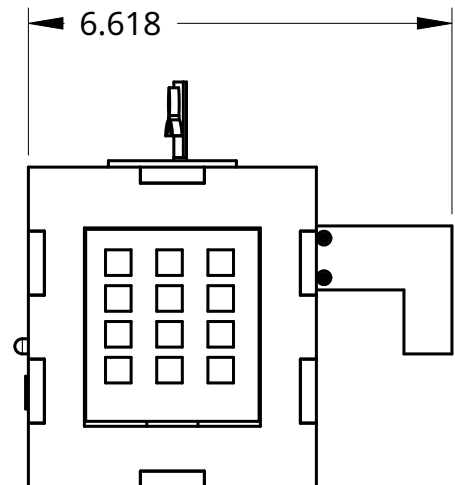

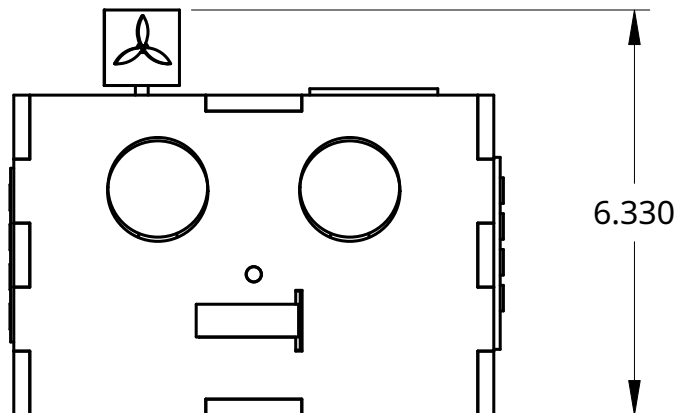

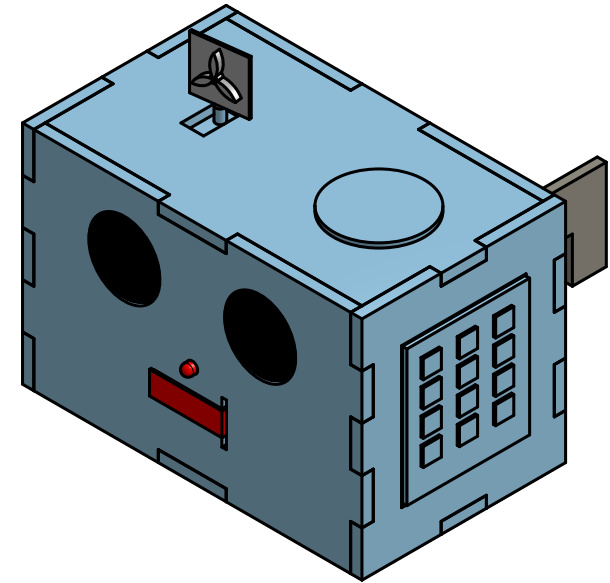

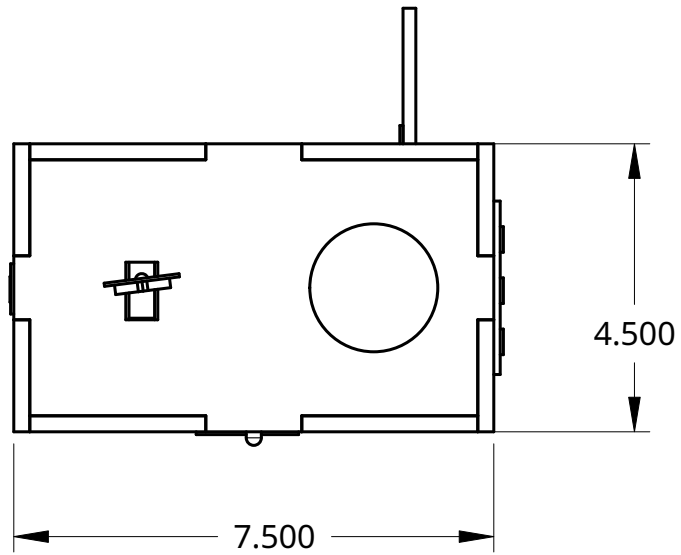

Part is symmetrical top to bottom. Side notches are equal and symmetrical to each other.

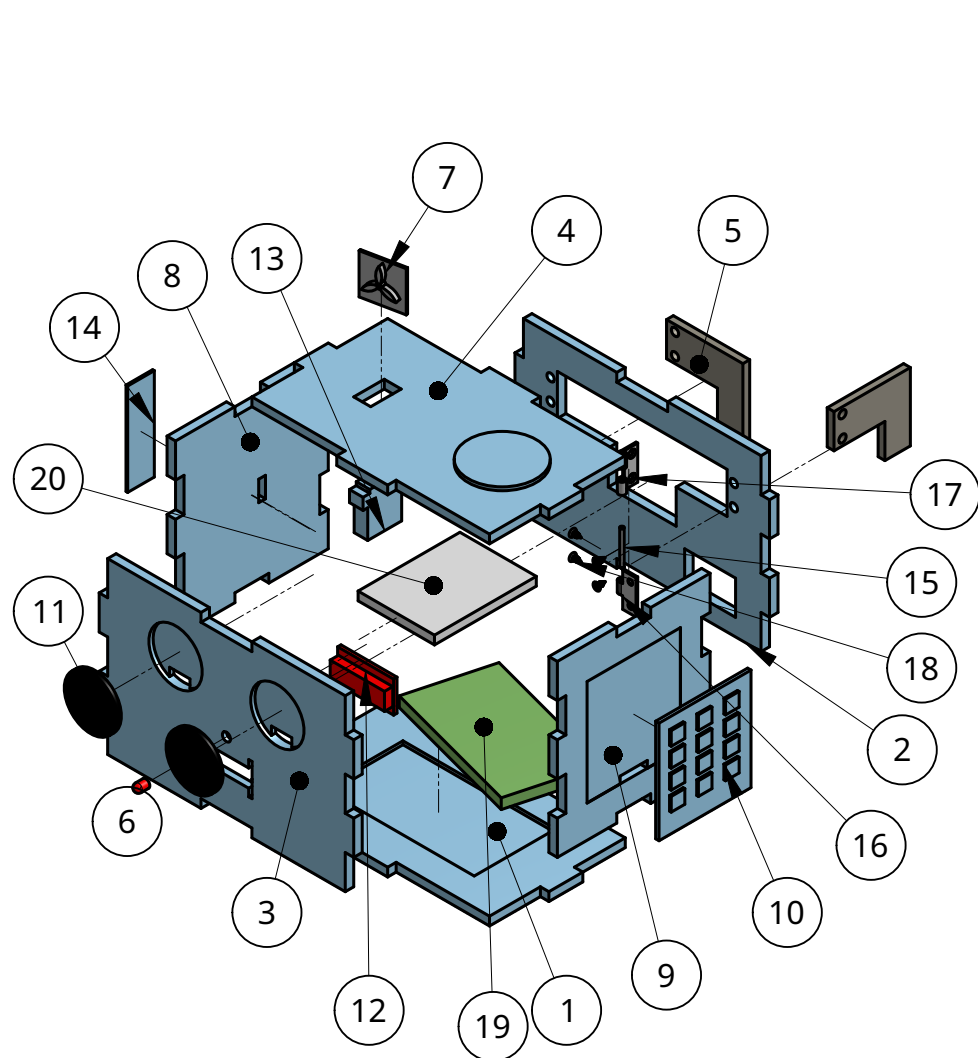

Holes are equal in diameter and spaced evenly from the edge.
